PROFESSIONAL SUMMARY

Final-year Computer Science and Business Systems undergraduate with hands-on full-stack development experience (Flask, MySQL, Firebase) gained through an internship and multiple end-to-end projects. Skilled in building role-based, secure web applications and translating business requirements into functional software. Proven leadership through club and event roles; seeking a Software Engineer / Software Development role to apply strong problem-solving and coding skills.

TECHNICAL SKILLS

- **Languages & Databases:** Python, Java (basics), C, JavaScript, MySQL
- **Frameworks & Backend:** React.js, Flask, HTML5, CSS3, Firebase Auth
- **Tools & Platforms:** Git/GitHub, Figma, Snowflake, VS Code, Power BI
- **Additional Skills:** Data Analysis & Visualization (Python), RPA (UiPath), Role-Based Access Control, Agile basics

INTERNSHIP EXPERIENCE

Tessolve Semiconductors Pvt Ltd - Software Engineering Intern *Jun 2025 – Jul 2025*

- Built a role-based procurement management web application using React.js, digitizing manual purchase-request and approval workflows for engineering teams and cutting paperwork-based processing steps by an estimated 40%.
- Implemented front-end components and role-based UI views (requester, approver, admin) in React.js, coordinating with backend and design teams to align features with business requirements.
- Participated in code reviews and daily stand-ups, gaining exposure to agile development practices in a live engineering environment.

Engineering Supply Chain Management System *Team Project*

Tech Stack: React.js, Flask, MySQL, Firebase Authentication

- Built a secure, role-based web platform that digitizes procurement for engineering organizations, covering purchase requests, multi-level approvals, and real-time inventory tracking.
- Developed a Flask REST API backend integrated with MySQL to manage purchase-request state transitions and inventory updates.
- Implemented role-based authorization (requester, approver, admin) using Firebase Auth to secure sensitive procurement data.

PROJECTS

FinWell - Retirement Planning Platform *Team Project*

Tech Stack: HTML, CSS, JavaScript, MySQL, Firebase Authentication

- Designed and developed a full-stack retirement planning platform that generates personalized retirement plans and savings projections based on user-input preferences (income, age, retirement goals).
- Implemented secure user authentication and session management using Firebase Auth, supporting multi-user access.
- Designed a normalized MySQL schema to store user profiles and compute savings projections dynamically.

EDUCATION

Rajalakshmi Engineering College *Expected [2027]*

Bachelor of Technology, Computer Science and Business Systems | CGPA: [8.36 / 10]

CERTIFICATIONS & COURSES

- Java Foundation Certification & Programming Using Java - Infosys Springboard
- Data Analysis with Python & Data Visualization with Python - IBM
- RPA Design & Development - UiPath

ACHIEVEMENTS

- 2nd Place - Pitch Perfect (Intellexa Club, REC) and Idea Contest (Enactus Club, REC)
- Top 100 Teams - AI for Bharat national hackathon | Top 50 Teams - HackHerVerse, GDG REC

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Partnership Associate, INOVX - sourced and managed external partnerships/sponsorships
- PR Lead, Intellexa Club | Content Writer, Film Club | Member, IEEE TEMS & Enactus Club, REC

LANGUAGES

Telugu (Native/Bilingual) • English (Fluent) • Tamil (Proficient) • Hindi (Proficient) • French (Elementary)
